

## VARIETIES OF FRUIT

DISCUSSED BY SALT RIVER ORCHARDISTS YESTERDAY.

Report of a Committee Appointed to Report Upon Those Fruits Best Adapted to the Country.

The meeting of the citizens interested in fruit culture was well attended yesterday. H. R. Patrick assumed the chair and H. H. Logan acted as secretary.

The report of the committee on fruit, composed of L. Fowler, F. W. Penberton and F. B. Devereaux, was read by Mr. Fowler before the meeting as follows:

MR. CHAIRMAN AND FELLOW CITIZENS:—Your committee appointed a week ago to investigate as to the best fruits to plant and soil adapted to the different kinds, wish to submit this report. The short time taken, has allowed only a partial study of the subject, but we hope every one present will keep up the study and assist the raising of fruit as the true industry of the people of this valley.

ORANGES—Should be grown in red or light loams. Navel and Mediterranean sweets, such as where ironwood grows in this valley; seedlings, about foothills or high ground.

LEMONS—As above, about the foothills, among ironwood.

PEACHES—Early Crawford, plant yellow; best for market; Sellers' Early Cling, canning or shipping.

APRICOTS—Light loams. Royal can be planted, best market variety; Newcastle, best early variety; Moorpark, not to be shy later; Early Golden, good, but not.

GRAPE—Red loams and sandy or gravelly soils. Malaga, for raisins or the best early white market grape; Tokay, good shipper, nearly white; Muscat, for raisins; a moderate shipper; White Corinth, earliest white grape, seedless, ships quite well; Black July, earliest black grape, very vigorous and prolific; Seedless Sultan, seedless raisins or currants.

PLUMS—Lighter soils. White Adriatic, vigorous, good bearer.

PEARS—Heavier soils. Bartlett, most profitable market pear; Winter Nellis, very sure here.

POMEGRANATES—Two kinds, unnamed; very thrifty here.

DAI—Very thrifty here.

OLIVES—Do well and fruit successfully.

AVOCADO—Except experimentally, walnuts, prunes, plums (except the Kelsey Japan plum, which is probably a success). There is promise in almonds of the right kind in some localities.

In blackberries, the Crandall Early is a success. Two unnamed varieties of strawberries are a success. Wine grapes are left for those better acquainted, but they are quite successful.

We believe that not less than five acres should be planted of single varieties of one kind of fruit, and better ten acres, as otherwise the crop will be too much scattered for profit.

The most serious objection to the orchards heretofore is that they are planted of a few trees of too great a number of kinds, making it quite out of the question to get fruit together in merchantable quantities or to secure the care and attention necessary to its successful harvest.

There can be no danger of overstocking the market with apricots, grapes, pears, good peaches or oranges and lemons. Olives, grapes, pomegranates and figs grow readily from cuttings.

We recommend, especially, for large orchards, apricots, pears, peaches and oranges, a location near the foothills. We advise planting vineyards of both rain and shipping varieties, not less than ten acres of a kind, for the same reason given on orchards.

Discussion was had among a number present as to the different varieties of grapes and peaches most suitable to be planted in the valley and much valuable information was gathered from the remarks of Messrs. Holmes, of California, and Jones and Turner, of the valley.

They gave their experiences and suggested those varieties for which the soil and system of cultivation in the valley are best adapted. Mr. Jones recommended the Seedless Sultan highly as a coming raisin grape or substitute for current and Mr. Turner's favorite peach was the Early Parsons.

Chairman Patrick suggested that subjects be divided between different members and that each member be collected and given at the different meetings, each member, having his subject apportioned, would be better prepared. He also suggested that manuals and periodicals on fruit culture be brought into the meetings by anyone having them.

By motion it was decided that the meetings would be continued every Saturday hereafter, under the auspices of the Fruit Growers' Association.

THIS \$6 BOOK FREE TO YOU

WEBSTER'S ENCYCLOPEDIA OF USEFUL INFORMATION AND WORDS AND WORDS

IT AFFORDS US PLEASURE TO ANNOUNCE TO THE PEOPLE THAT we are about to give them a great benefit. Notwithstanding we have always been known as the most enterprising merchants in this section, and that we have sold the best goods in nearly every case lower than others, we believe it is right to do the best we can by our patrons, thereby securing not only the largest amount of trade but also the greatest number of friends.

We want everybody to understand that we are not trying to see how few goods we can give for a dollar, but how many.

We will issue a commutation Card to you, and as cash purchases are made at our store the card will be punched, and when purchases to the amount called for by the card have been made, we will give you \$6.00 in the form of this magnificent book, entitled

"Webster's Encyclopedia of Useful Information and World's Atlas,"

A brief description of which can be found on the back of the card.

We cannot, in such limited space, give a complete description of the book, for it must be seen to be appreciated. Suffice it to say that such an offer has never before been made in this community. The book measures 10x12 1/2 inches, is 5 1/2 inches thick and occupies a space of 312 cubic inches—being Royal Octavo in size, containing 566 pages, 188 fine illustrations and 50 finely-engraved Maps, all prepared expressly for this book. It is printed from large new type, on good paper, and is handsomely and durably bound in Morocco Cloth.

Every volume is worth \$6.00 to any person or any family, and is really a household necessity. Notwithstanding the fact that we have the reputation of selling goods cheaper than anyone else, or prices will still be as low, if not lower than ever before. We will be amply repaid for the great expense we will have by selling to our regular customers, and of enjoying the trade of scores of new ones.

In order to get the right to distribute these valuable books, we were obliged to order enough to supply one to every family for miles around. Visit us at once, examine our stock and prices as we have become convinced you can do better with us than where you are trading now, if not buying your goods at our store.
